

# RecorDIM 2006 Partners Meeting

(Rome – May 14 & 15, 2006)

(draft-2)

## Proposed agenda

### Purpose of meeting

The prime purpose of this meeting is to focus on, and provide significant support to task groups that are delivering in 2006 and 2007.

#### Day-1 (May 14 – 9h00 to 17h30 – Place TBC)

- First, we will review in detail the activities of approximately 5 task groups where significant time will be spent at ensuring that these TGs get as much help as possible, from **RecorDIM Partners at large**, so they deliver in 2006.
- Then, we will review in some detail the activities of other task groups that should be delivering in 2007.

#### Day-2 (May 15 – 9h00 to 17h30 – ICCROM Centre (TBC))

- Discuss how RecorDIM TG activities should evolve during the course of 2006-7 so as to be taken over by some of CIPA Working Group Chairs. For this discussion to be fruitful, it is important that:
  - o Bill Blake
  - o Mario Santana
  - o Jose Luis Lerma, and
  - o Fulvio Rinaudo

... participate to this meeting as they have been appointed in Torino (during the CIPA Symposium last September) as Co-Chairs of the new CIPA Working Groups.

It should be mentioned that CIPA has recently added a RecorDIM page to their web site, which contains the following introduction / link to RecorDIM:

**RecorDIM** (<http://cipa.icomos.org/index.php?id=362> )

*RecorDIM (Recording, Documentation and Information Management) is a CIPA-ICOMOS-Getty initiative installing an international 5-year (2002-07) partnership between international heritage conservation organizations working together to bridge the gaps that currently exist between the information users (researchers, conservation specialists of all trades, project managers, planners etc.) and the information providers (photographers, heritage recorders, photogrammetrists, surveyors, etc.).*

You can find more information about RecorDIM on its  [official webpage](#). “

- Also, during Day-2 we should talk about / prepare for the possible '2006 CIPA Executive & WG Chairs Retreat' that should take place at the end of August 2006, in Greece;
- Finally, we should discuss the possible agenda for the next 2006 RecorDIM Roundtable-6 that could / should take place in Cyprus (in October 2006).

#### Day-3

- Technical Visits (TBC) :
  - o For those staying an extra day in Rome, we are looking into the planning of visits to conservation organizations located in Rome (e.g. the ICCROM Center's activity groups, the ITABC-CNR (Institute for technologies applied to cultural heritage - Italian National Research Council - Maurizio Forte), and / or other centres. Your suggestions are most welcome.
